Where the publication includes materials from sources other than SQA (secondary copyright), this material should only be reproduced for the purposes of examination or assessment. If it needs to be reproduced for any other purpose it is the centre's responsibility to obtain the necessary copyright clearance. SQA's NQ Delivery: Exam Operations may be able to direct you to the secondary sources.

These Marking Instructions have been prepared by Examination Teams for use by SQA Appointed Markers when marking External Course Assessments. This publication must not be reproduced for commercial or trade purposes.

## General Marking Principles

These principles describe the approach to be taken when marking Intermediate 2 Mathematics papers. For more detailed guidance please refer to the notes which are included with the Marking Instructions.

1 Marks must be assigned in accordance with the Marking Instructions. The main principle in marking scripts is to give credit for the skills demonstrated and the criteria met. Failure to have the correct method may not preclude a candidate gaining credit for the calculations involved or for the communication of the answer.

2 The answer to one part of a question, even if incorrect, must be accepted as a basis for subsequent dependent parts of the question. Full marks in the dependent part(s) may be awarded provided the question is not simplified.

3 The following should not be penalised:

- working subsequent to a correct answer (unless it provides firm evidence that the requirements of the question have not been met)
- omission or misuse of units (unless marks have been specifically allocated for the purpose in the marking scheme)
- bad form, eg $\sin x^{\circ}=0.5=30^{\circ}$
- legitimate variation in numerical values / algebraic expressions.

4 Solutions which seem unlikely to include anything of relevance must nevertheless be followed through. Candidates still have the opportunity of gaining one mark or more provided the solution satisfies the criteria for the mark(s).

5 Full credit should only be given where the solution contains appropriate working. Where the correct answer may be obtained by inspection or mentally, credit may be given, but reference to this will be made in the Marking Instructions.

6 In general markers will only be able to give credit for answers if working is shown. A wrong answer without working receives no credit unless specifically mentioned in the Marking Instructions. The rubric on the outside of the question papers emphasises that working must be shown.

7 Sometimes the method to be used in a particular question is explicitly stated; no credit should be given where a candidate obtains the correct answer by an alternative method.

8 Where the method to be used in a particular question is not explicitly stated, full credit must be given for alternative methods which produce the correct answer.

9 Do not penalise the same error twice in the same question.
10 A transcription error is taken to be the case where the candidate transcribes incorrectly from the examination paper to the answer book. This is not normally penalised except where the question has been simplified as a result.

11 Do not penalise inadvertent use of radians in trigonometry questions, provided their use is consistent within the question.

12 When multiple solutions are presented by the candidate and it is not clear which is intended to be the final one, mark all attempts and award the lowest mark.

## Practical Details

The Marking Instructions should be regarded as a working document and have been developed and expanded on the basis of candidates' responses to a particular paper. While the guiding principles of assessment remain constant, details can change depending on the content of a particular examination paper in a given year.

1 Each mark awarded in a question is referenced to one criterion in the marking scheme by means of a bullet point.

2 Where a candidate has scored zero marks for any question attempted, "0" should be shown against the answer in the place in the margin.

3 Where a marker wishes to indicate how the marks have been awarded, the following should be used:
(a) Correct working should be ticked, $\checkmark$.
(b) Where working subsequent to an error is followed through and can be awarded marks, it should be marked with a crossed tick, $\ltimes$.
(c) Each error should be underlined at the point in the working where it first occurs.

4 Do not write any comments, words or acronyms on the scripts.

Mathematics Intermediate 2: Paper 1, Units 1, 2 and 3 (non-calc)

| Question No | Marking Scheme Give 1 mark for each - | Illustrations of evidence for awarding a mark at each • |
| :---: | :---: | :---: |
| 1 | Ans: $£ 1158 \mathbf{0 0 0} 000000$ <br> - ${ }^{1}$ process: round correctly | -1 1158000000000 |
| NOTES: |  |  |

| Question No | Marking Scheme Give 1 mark for each • | Illustrations of evidence for awarding a mark at each • |
| :---: | :---: | :---: |
| 3 (a) | Ans: $\quad \mathbf{A}(\mathbf{0}, 12)$ <br> - ${ }^{1}$ communicate: state coordinates of A | $\bullet^{1}(0,12) \quad 1$ mark |
| NOTES: |  |  |
| (b) | Ans: $\quad \mathbf{C}(3,8)$ <br> -1 strategy: know to substitute in expression <br> - ${ }^{2}$ communicate: state coordinates of C | - ${ }^{1} \quad 4 x+3(8)=36$ <br> $\bullet^{2} \quad(3,8)$ |
| NOTES: |  |  |
| 1. For a correct answer without working |  | award $2 / 2$ |

| Question No | Marking Scheme Give 1 mark for each • | Illustrations of evidence for awarding a mark at each • |
| :---: | :---: | :---: |
| 4 | Ans: 34 ${ }^{\mathbf{0}}$ <br> $\bullet^{1}$ process: calculate size of angle OSR <br> $\bullet$ process: calculate size of angle PSR <br> $\bullet^{3}$ process: calculate size of angle QRS | - ${ }^{1} \quad 90^{\circ}$ <br> - ${ }^{2} \quad 118^{\circ}$ <br> - ${ }^{3} \quad 34^{\circ}$ $3 \text { marks }$ |

## NOTES:

1 Alternative methods
METHOD TWO (USING TRIANGLE ORS)

- process: calculate size of angle OSR
- $\quad 90^{\circ}$
- ${ }^{2}$ process: calculate size of angle SOR
$\bullet^{2} \quad 56^{\circ}$
- process: calculate size of angle QRS
-3 $\quad 34^{\circ}$

METHOD THREE (USING TRIANGLE QRS)

- ${ }^{1}$ process: calculate size of angle OSR
- ${ }^{1} \quad 90^{\circ}$
- ${ }^{2}$ process: calculate size of angle QSR and SQR
$\bullet^{2} \quad 28^{\circ}$ AND $118^{\circ}$
- process: calculate size of angle QRS
- $34^{\circ}$

2. For a correct answer without working award $3 / 3$
3. For marks 1 and 2 , angles need not be explicitly stated. They may be marked on a diagram
4. For the final mark to be awarded, the size of angle QRS must be stated explicitly

| Question <br> No | Marking Scheme <br> Give $\mathbf{1}$ mark for each • | Illustrations of evidence for awarding a <br> mark at each • |  |
| :---: | :--- | :--- | :--- |
| 5 | (a) | Ans: 20 160 |  |
| $\bullet^{1}$ process: calculate the mean | $\bullet^{1} 20160$ | $\mathbf{1 ~ m a r k}$ |  |

## NOTES:

(b)

| Ans: $\quad$ The median, with reason |  |  |
| :--- | :--- | :--- |
| $\bullet \bullet$ communicate: state median with reason | $\bullet$ median with reason | $\mathbf{1}$ mark |

## NOTES:

1. The reason must refer to the fact that the mean is affected by one very high attendance or that the median is closer to the majority of the attendances
2. SOME COMMON ANSWERS

| "The median because it is close $(\mathrm{r})$ to all except one of the attendances" | award $1 / 1$ |
| :--- | :--- |
| "The median because it is close $(\mathrm{r})$ to most of the numbers" | award $1 / 1$ |
| "The median because it is close $(\mathrm{r})$ to the numbers" | award $0 / 1$ |

| Question No | Marking Scheme Give 1 mark for each • | Illustrations of evidence for awarding a mark at each • |
| :---: | :---: | :---: |
| 6 (a) | Ans: 2 and 4 <br> - ${ }^{1}$ process: write down roots | - ${ }^{1} x=2$ AND $x=4$ |
| NOTES: |  |  |

| (b) | Ans: $\quad \mathbf{A}(\mathbf{0}, \mathbf{8}), \mathbf{B}(\mathbf{2}, \mathbf{0}), \mathbf{C}(\mathbf{4}, \mathbf{0})$ |  |  |
| :---: | :--- | :--- | :--- |
|  | $\bullet^{1}$ process: state coordinates of A | $\bullet^{1} \mathrm{~A}(0,8)$ |  |
|  | $\bullet^{2}$ process: state coordinates of B | $\boldsymbol{\bullet}^{2} \mathrm{~B}(2,0)$ | $\mathbf{3}$ marks |
|  | $\bullet^{3}$ process: state coordinates of C | $\bullet^{3} \mathrm{C}(4,0)$ |  |

## NOTES:

1. Incorrect roots in part (a) must be followed through to give the possibility of awarding $2 / 3$ in part (b)

| (c) | Ans: $\quad \boldsymbol{x}=\mathbf{3}$ <br> $\bullet^{1}$ process: state equation of axis of <br> symmetry | $\bullet^{11} x=3$ | $\mathbf{1}$ mark |
| :---: | :--- | :--- | :--- |

## NOTES:

1. Incorrect co-ordinates for B and C in part (b) must be followed through to give the possibility of awarding full credit in part (c)

| $\begin{aligned} & \text { uesti } \\ & \text { No } \end{aligned}$ | Marking Scheme Give 1 mark for each | Illustrations of evidence for awarding a mark at each • |
| :---: | :---: | :---: |
| 9 | Ans: <br> - ${ }^{1}$ process: know max/min values <br> - ${ }^{2}$ process: show that there is one cycle of sine graph in $360^{\circ}$ <br> -3 process: negative trig graph correctly drawn <br> - ${ }^{1}$ graph lies between +2 and -2 <br> - ${ }^{2} \quad$ evidence from graph <br> - $\quad$ evidence from graph |  |
| NOTES: <br> 1. Disregard poor draughtsmanship <br> 2. SOME COMMON ANSWERS $\begin{aligned} & y=-2 \sin x^{\circ} \\ & y=-2 \cos x^{\circ} \\ & y=2 \sin x^{\circ} \\ & y=-\sin 2 x^{\circ} \\ & y=2 \cos x^{\circ} \\ & y=-\cos 2 x^{\circ} \\ & y=\sin 2 x^{\circ} \\ & y=\cos 2 x^{\circ} \end{aligned}$ <br> award 3/3 $\quad \checkmark \checkmark \checkmark$ <br> award 2/3 $\quad \checkmark \times \checkmark$ <br> award 2/3 $\quad \checkmark \checkmark x$ <br> award $2 / 3 \quad x \not x \checkmark$ <br> award 1/3 $\quad \checkmark \times x$ <br> award 1/3 $\quad x \times r$ <br> award $1 / 3 \quad x x x$ <br> award 0/3 $x \times x$ |  |  |

| Question No | Marking Scheme Give 1 mark for each | Illustrations of evidence for awarding a mark at each • |
| :---: | :---: | :---: |
| 10 | Ans: 2 <br> - ${ }^{1}$ Process: start to simplify <br> - ${ }^{2}$ Process: simplify | $\begin{array}{ll} \bullet \quad & \sqrt{6}+\sqrt{4}-\sqrt{6} \text { or } \\ & \sqrt{2} \sqrt{3}+\sqrt{2} \sqrt{2}-\sqrt{2} \sqrt{3} \\ \bullet & 2 \end{array}$ $2 \text { marks }$ |
| NOTES: <br> 1. <br> 2. | a correct answer without working <br> AUTION: The correct answer may be $\begin{aligned} & 2(\sqrt{3}+\sqrt{2})-\sqrt{6} \\ & \sqrt{2}(\sqrt{5})-\sqrt{6} \\ & \sqrt{10}-\sqrt{6} \\ & \sqrt{4} \end{aligned}$ $2$ | $\text { award } 0 / 2$ <br> an incorrect method, eg |

## TOTAL MARKS FOR PAPER 1 <br> 30
