Paper 1

National 5 Booster Paper C1
Duration: 1 hour 15 minutes

Total Marks - 50

Attempt ALL questions.
You may NOT use a calculator
To earn full marks, you must show your working in your answers.
State the units for your answer where appropriate.
Write your answers clearly in the spaces provided in this booklet.
Use blue or black ink.

## Notes:

- This is a Booster Paper. Your May exam will be (a bit) harder than this.
- The Booster Papers get more challenging as you work through them.
- The final Booster Paper will be as challenging as your May exam.
- The number of marks indicated beside each question is intended as a guide and may differ slightly from SQA marking instructions.
- These original papers are produced independently of the SQA and are free of charge.
- All Booster Papers and answers can be found at www.maths180.com/BoosterPapers

## FORMULAE LIST

The roots of $a x^{2}+b x+c=0$ are $\quad x=\frac{-b \pm \sqrt{b^{2}-4 a c}}{2 a}$

Sine Rule:
$\frac{a}{\sin A}=\frac{b}{\sin B}=\frac{c}{\sin C}$

Cosine Rule:
$a^{2}=b^{2}+c^{2}-2 b c \cos A$ or $\cos A=\frac{b^{2}+c^{2}-a^{2}}{2 b c}$

Area of a triangle:
$A=\frac{1}{2} a b \sin C$

Volume of a sphere:
$V=\frac{4}{3} \pi r^{3}$

Volume of a cone:
$V=\frac{1}{3} \pi r^{2} h$

Volume of a pyramid:
$V=\frac{1}{3} A h$
Standard deviation:

$$
s=\sqrt{\frac{\sum(x-\bar{x})^{2}}{n-1}}
$$

or $\quad s=\sqrt{\frac{\sum x^{2}-\frac{\left(\sum x\right)^{2}}{n}}{n-1}}$, where $n$ is the sample size.

## Total marks - 50

## Attempt ALL questions

MARKS

1. Multiply the brackets and simplify

$$
3 x-(3 x-2)^{2}
$$

2. Evaluate $7 \frac{1}{3}-2 \frac{4}{5}$ Leave your answer as a mixed number.
3. Express the increase from 24 to 30 as a percentage.
4. This circle has its centre at C .

- CB and CE are radii
- $A E$ is a diameter
- Angle $\mathrm{DAE}=40^{\circ}$ and angle $\mathrm{BCA}=70^{\circ}$

Find the size of angle BED.

3
5. (a) Factorise $10 x-24 x^{2}$
(b) Fully factorise $18-50 x^{2} \quad 2$
6. Express $x^{2}+10 x-7$ in the form $(x+a)^{2}-b$ and write down the values of $a$ and $b$.
7. Change the subject of this formula to $q$.

$$
\frac{8 h-7 q}{5}=3
$$

8. This hoodie is on special offer.

The price of the hoodie has been reduced by $20 \%$. The reduced price is $£ 60$.

How much did the hoodie cost before the reduction? 3
9. Simplify $\left(2 x^{-5}\right)^{3}$
10. The diagram shows part of the graph of a quadratic function with equation $y=x^{2}+x-12$.
(a) Calculate the coordinates of $A$ and $B$, the roots of the graph.
(b) Write down the coordinates of C, the $y$ - intercept of the graph.
11. A straight line has equation $3 x+2 y=8$.
(a) Determine the gradient of this line.
(b) Find the coordinates of the point where this line crosses the $y$-axis. 1
(c) Determine whether the line passes through the point $(-2,7)$. 2
12. (a) Fully simplify $\sqrt{32}+\sqrt{8}-\sqrt{18}$.
(b) Write $\frac{15}{4 \sqrt{5}}$ with a rational denominator in its simplest form.
13. A bag contains 23 coins. The coins are either 10 pence or 50 pence coins. Let $x$ represent the number of 10 pence coins and let $y$ represent the number of 50 pence coins.
(a) Write an equation to represent this information.

The total value of all the coins in the bag is $£ 5.50$.
(b) Write an equation to represent this information.
(c) Find, algebraically, the number of 10 pence coins and the number of 50 pence coins.
14. This rectangle has length given by $x+6$ and breadth given by $x-3$. All lengths are in centimetres.
(a) Show that the area can be written as $x^{2}+3 x-18$.

The actual area of the rectangle measures 10 square centimetres.
(b) Find, algebraically, the value(s) of $x$. 4
